

Huawei FusionSolar High Voltage Storage Revolutionizes Telecom Towers in China

Huawei FusionSolar High Voltage Storage Revolutionizes Telecom Towers in China

Why Telecom Towers Need Smarter Energy Solutions

telecom towers are like energy-hungry sentinels guarding our digital connectivity. With over 2 million towers across China consuming 20+ billion kWh annually, these steel giants have become the Achilles' heel of sustainable infrastructure. Enter Huawei's FusionSolar high-voltage storage systems, turning this challenge into a masterclass of energy innovation.

The Numbers Don't Lie

40% reduction in diesel generator usage at pilot sites

92.5% round-trip efficiency in extreme temperatures (-40°C to 60°C)

15-year lifespan with
